**FAVORS TWINE PLANT**

Teslerman Has Secured Statistics From Other States and Wants Plant in State Penitentiary.

In support of his efforts to have the present legislature adopt his idea of establishing a twine plant at the state penitentiary, Representative Tom Teslerman of Noble county has secured some statistics from J. L. Cline, superintendent of the twine mills of the Kansas state penitentiary at Lansing.

Cline says that at present eight states have twine mills in operation in their state penitentiaries, all of which are proving a success both from the standpoint of finances and reformation. Nebraska and Montana are contemplating the addition of such plants to their state prisons.

The letter states that Minnesota produced 10,000,000 pounds of twine per annum from which the state claims a profit of \$250,000. The twine plant at the Kansas pen is unable to supply one-fifth the demand for the product from that state. Mr. Cline states that \$200,000 would establish a good twine plant in the Oklahoma state penitentiary which would be a paying proposition. He states that Oklahoma would have an advantage because a number of the prisoners in the Oklahoma penitentiary are trained in the art of twine making as they were removed from Kansas where they became skilled workers in the plant there.
